WORK EXPERIENCE

SOFTWARE DEVELOPER AT TIMNJIZ TECH BUSINESS CENTER

February 2021 to date - Part time

- I introduced agile methodologies and effective development best practices to division to enhance product development.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- I am responsible of maintaining, expanding, and scaling our site
- Researching, designing, implementing, and managing software programs are always on my routine.
- Identifying areas for modification in existing programs and subsequently developing these modifications.
- Testing and evaluating new programs.
- Contributed ideas and suggestions in team meetings and delivered updates on strict deadlines.
- Stay plugged into emerging technologies/industry trends and apply them into operations and activities.

FREELANCE WEB DEVELOPER

Jan 2020 to Jan 2021

As a freelancer, my roles were to:

- Create website layout/user interface by using standard HTML/CSS and JavaScript practices.
- Write well designed, testable, efficient code by using best software development practices.
- Integrate data from various back-end services and databases.
- Gather and refine specifications and requirements based on technical needs.
- Create and maintain software documentation.
- Market myself through the media to get more clients

DATA ENTRY SPECIALIST AT CLOUDFACTORY.

Sept 2019 to date - Part time

- Working part time answering queries related to data, review data for deficiencies or errors, correct any incompatibilities if possible and check output
- Ensuring data is accurate and complete.
- Compiling, verify accuracy and sort information according to priorities to prepare source data for computer entry.
- Keep information confidential
